FIRE DEPOTS IN TiNAO

The fire station in the Filimonkovsky settlement of New Moscow, designed for 4 cars, will soon be completed. The current readiness is about 90%. The source of financing is the Targeted Investment Program of Moscow.

The number of employees of the fire and rescue squad will be approximately 90 people, including the duty shift — 26 people. The equipment consists of 3 duty vehicles and 1 backup.

The commissioning of the facility is scheduled for the 3rd quarter of 2023.

The fire station building will be functionally divided. It will include premises for the placement of fire equipment and its maintenance, a gas and smoke protection service, a duty service, rooms for the maintenance of hoses, office premises and a meeting room.

According to the project, there will be rooms for eating, passing a medical examination, a classroom, and a meeting hall.

A recovery center for personnel with a gym, sauna, relaxation rooms and psychological relief will be opened.

A 4-storey training tower with a climbing wall, a treadmill and training fire hydrants, as well as a training ground for fire equipment will be built on the territory.

On the adjacent territory there will be a parking lot, parking spaces for passenger vehicles and heavy-duty vehicles for 12 cars, including 1 car space for people with limited mobility.

Specialists will also install outdoor lighting, install small architectural forms, break lawns and flower beds, plant trees and shrubs.

The fire station, according to Vladimir Zhidkin, will ensure the timely response of special services in the event of an emergency in the home area.

By the end of 2023, it is planned to build a fire station for 2 cars in the settlement of Novofedorovskoye, a fire station for 4 cars in the settlement of Ryazanovskoye and a fire station for 4 cars in the settlement of Pervomayskoye on the territory of the TiNAO of Moscow.

Deputy Mayor of Moscow in the Government of Moscow on Urban Planning Policy and Construction

Andrei Bochkarev said that security issues have a high priority in the work of the Government

Moscow. «The introduction of such infrastructure will increase the responsiveness of special services to emergency situations,» the deputy mayor concluded. (According to DRNT)

A SECTION OF THE KOMMUNARSKOYE HIGHWAY IS PROMISED TO BE COMPLETED UNTIL THE END OF 2025

In 2025, it is planned to complete the construction of the Kommunarskoye highway section. This was reported by the head Department of Construction of the City of Moscow Rafik Zagrutdinov on the website of the Government Information Center Moscow.

The official explained that the new highway will improve transport accessibility and connectivity of the settlements of Sosenskoye and Voskresenskoye TiNAO, the village of Kommunarka and the capital districts of Yuzhnoye and Severnoye Butovo.

«The project provides for the construction and reconstruction of roads with a total length of 6.3 kilometers, including including one overpass with a length of 482 meters. This will create a new, full-fledged and traffic-free transport connection on the section from the MKAD to the Solntsevo – Butovo - Varshavskoye Highway, taking into account the implemented section of the Kommunar Highway from the MKAD to Alexandra Monakhova Street,» Zagrutdinov added.

The head of Depstroy clarified that the general designer – JSC «Mosproekt-3» – will complete the development of documentation this month. The contractor will enter the construction site in the second quarter of 2023. Construction and installation work will be completed in 2025.

«After the construction is completed, the capacity of the southern section of the MKAD, Kaluga Highway and Alexandra Monakhova, Bachurinskaya, Linden Park, Academician Semenov, as well as Kuprin Avenue will increase,» Rafik Zagrutdinov concluded.

STUDENTS OF THE TRINITY DEPARTMENT OF THE EDUCATIONAL THE COMPLEX «SOUTHWEST» UNDER THE GUIDANCE OF A TEACHER

A master class on cooking strawberries in chocolate was held by 3rd year students of the Troitskoe department, studying in the direction of «Cooking», and the teacher of the department Dmitry Sergeevich Bakharev.

As part of career guidance events, students and a teacher of the Complex held an off-site culinary master class in the coffee shop of the fitness center «Culture» in the city of Troitsk. They showed how to cook strawberries in chocolate and decorate it.

The master class was attended by almost 20 visitors of the coffee shop of all ages. From our experts, they learned that each of the three types used chocolate has its own characteristics. «It's very nice to realize that we have already accumulated our own «chef's» secrets, which are not always known to amateurs. For example, bitter chocolate melts at a temperature of 32 degrees – it is important to know this in order to achieve the desired consistency and taste, which will help make strawberries even more refined,» she said Svetlana, a student of the Troitskoe department, a participant of the master class.

Visiting master classes for partner companies, students and students of other educational organizations are an important part of the student life of students

The complex. According to Dmitry Sergeevich Bakharev, such trips not only give knowledge and skills to participants, but also allow students of the Complex to self-actualize, increase self-confidence, develop communication skills.

For the summer period, teachers and students of the Troitskoe department have three more visiting master classes planned at the Kultura coffee shop, which we will definitely tell you about. Follow the news of the Complex.

! MORE THAN 40,000 RESIDENTS NEW MOSCOW REMAINS WITHOUT MAIL DELIVERY

We are talking about Muscovites who live permanently in private homes on the territory of the Novomoskovsky and Troitskiy administrative districts of the capital.

This was reported to the editorial office of the district newspaper «TiNAO» by sources close to the government of Moscow.

More than 600 garden associations of the Ministry of Defense became part of the capital back in July 2012 years and up to now remain without elementary delivery of mail.

NOTIFICATION OF THE MEETING ON APPROVAL LOCATION OF THE LAND PLOT BOUNDARY

Cadastral engineer Alyona Babushkina (107207, Moscow, 7a Chusovskaya str., office 206, ce.babushkina@gmail.com , 89999658758, registration number in the state register of persons engaged in cadastral activities 33765) cadastral works are being carried out to clarify the location of the boundaries of the land plot with cadastral number 50:21:0140107:176, located in: city Moscow, Desenovsky settlement, Desna-Agropoint village, house 16, cadastral quarter No. 77:17:0140107. The customer of cadastral works is Kolesnik Anastasia Olegovna, 107497, Moscow, Chusovskaya str., 8, sq. 24, 89255190008.

A meeting of interested persons regarding the coordination of the location of the borders will be held at the address: Moscow, Chusovskaya str., 7a, office 206, 03.08.2023 at 10.00. With the draft boundary plan of the land plot available at: Moscow, 7a Chusovskaya str., office 206.

Reasonable objections in writing about the location of the boundaries of land plots after familiarization with the draft boundary plan, and requirements for the coordination of the location of the boundaries of land plots on the ground are accepted from 01.07.2023 to 02.08.2023 to address: 107207, Moscow, Chusovskaya str., 7a, office 206.

Adjacent land plots, with respect to the location of the boundaries of which approval is being carried out: cadastral number 50:21:0140107:344, located: Moscow, Leninsky district, rural settlement Desenovskoe ter, Desna d, microdistrict Agropoint ter, d 17, kv uch. -17/2, cadastral quarter No. 77:17:0140107.

When carrying out the approval, it is necessary to have an identity document with you, as well as documents on the rights to the land plot (Part 12 of Article 39, Part 2 of Article 40 of the Federal Law of 24.07.2007 No. 221-FZ «On Cadastral Activity»)

«MOSCOW is HEALTHY»

The capital of our Motherland, the best Russian city. It has everything for a comfortable life of an ordinary person. So we are inspired by numerous media (TV screens, newspapers, magazines, banners, Internet sites and ...).

The question of dependence and payment, such flattering assessments.

Not the subject of this article, I suggest taking a look at the situation personally. After all, each of us wants to be healthy. And he lives with the hope of timely and high-quality help from Moscow medicine. Let's start with accessibility, preferably on foot. How complicated and long is your route to the attached polyclinic?

Are all specialists available in the first week of the request? For example, I'm trying to get in the second week. On the radiography of the knee joint, in the direction.

Modern specialists of the "sphere of health". A new term has been introduced into the everyday life of Muscovites - routing.

This is when you have to get to the right doctor, sometimes for hours, taking into account the capital's traffic jams, repairs and construction projects.

And the next specialist is waiting for you at the other end of the Capital. It turns out, a forced long journey. And help is important here and now. Although the financial result, of course, is not in our favor. Trips are paid, and personal time is banal - lost. But we will hope that at least we will gain health ...

Alas and ah, the cadres decide everything. Experience is important for a doctor, and these are years in the profession, extensive practice and innovation.

The level and quality of medical care provided to you personally can be very different. For reference: The amount of financial sanctions against medical organizations due to defects in the provision of assistance last year exceeded 23 billion rubles. In almost half of the regions, the total amount of fines exceeded 0.9% of the total amount of medical bills. (Source: <https://medvestnik.ru/>)

The personnel problem is "eternal", but with proper funding, the issue must be resolved. Money solves a lot! One of the largest urban programs in 2023 will continue to be "Metropolitan Healthcare". Budget expenditures under this program will amount to 530.5 billion rubles, taking into account the MHI funds - 899.4 billion rubles (+8.0%). In 2023, the

Moscow government plans to complete the implementation of a large-scale outpatient modernization program, within the framework of which 201 buildings of city polyclinics are being reconstructed. This is 50% of the outpatient fund of the capital. (Source: <https://tass.ru/>)
But not all!

Today's reality is frightening. Foreign companies are leaving the Russian market, leaving us without modern medical equipment and medicines. There is almost no domestic, - "overslept". The help of friendly countries is still invisible. I don't believe in the possibility of a "pharmaceutical embargo", but so many impossible things have happened. (The material was prepared by Vyacheslav Radchenko.)

IMPORTANT

NEW MOSCOW CONTINUES FIRE-FIGHTING RAIDS IN THE RESIDENTIAL SECTOR

With the onset of the summer fire-hazardous period, Muscovites and guests of the capital are told about the rules for handling open fire, reminded of the requirements of fire safety when making bonfires and burning garbage on the territories of their plots. Such preventive raids are carried out to prevent fires in suburban areas.

So, in June, employees of the PSO No. 301 Fire and Rescue Center conducted visual inspections of the TIZ «Rastoropovo» and the SNT «Red Proletarian», located in the settlement of Voskresenskoye.

«During the events, meetings were held with the population, conversations with board members, 6 violations of fire safety requirements were revealed, 2 of which were eliminated during inspections,» says Yuri Kulyushkin, deputy head of PSO No. 301.

Memos with fire safety rules and emergency phone numbers are distributed among residents, which should be called in case of a fire or other emergency situation.

Firefighters remind that adults should constantly hold conversations with their children on the topic of safe behavior both at home and outside.

Explanatory work is very important. Reminding residents about the rules of fire safety, experts thereby save them from a terrible disaster – a fire.

The TiNAO Department of the GOCSIP Department reminds of the need to comply with fire safety requirements during the summer fire-hazardous period at home and in nature, do not allow dry grass to burn, do not throw unopened cigarettes into garbage containers!

If a fire does occur, immediately call «101» or «112».

EXPERTS RETURNED TO NATURE FOUR HARES-RUSAKS

The hares found in the kindergarten in Peredelkino returned home to the wild after rehabilitation. This was told to the city newspaper NEW MOSCOW in the Department of Nature Management and Environmental Protection.

Specialists have raised and prepared for release four hares-hares found in a kindergarten in Peredelkino.

Now in many regions there is a decrease in the number of hares. Measures to return hares to the wild are very relevant, so special programs have been developed to restore the population of these animals.

For example, as part of the restoration of biodiversity, events were held in Moscow last year to release more than 100 hares into their natural habitat. All of them were raised and fed using a special technology that allows us to say with confidence that the animals will be able to continue their independent life in the wild.

4 adult hares have been prepared for this release. The release of hares took place as part of the work on the restoration of the populations of the hare and the white hare in the natural territories of Moscow. Both species are listed in the Red Book of Moscow.

What should a citizen do if he finds a bunny? Specialists of the Department of Nature Management and Environmental Protection of the City of Moscow have prepared an infographic for this case.

In natural and park areas, and sometimes even in residential buildings of the city, you can find hares. At this age, in case of danger, the animals cannot move quickly, and therefore prefer to hide, maintaining a state of inhibition.

Therefore, you should not take them in your hands, and even more so withdraw them from the natural environment. The cubs grow up quickly, gain strength and they adapt to living conditions in a state of freedom. Already at the age of two weeks, the hares begin to feed themselves with natural feeds!

The little lump, of course, looks very helpless and lonely, it's easy to think that he got lost, and something bad happened to his mom. But in the wild, hares, like fledglings, are not lost! No need to pick them up. Even if the mother hare is not noticeable nearby, she remembers where her children are and will definitely come back to feed them. If you move the bunny to another place, then he can really get lost. And if you take the animal home, it means stealing it from its mother.

You do not need to take a bunny in your arms to take a picture – this will attract the attention of predators to him. In addition, hares have a very excitable type of higher nervous activity. A meeting with a person, and even more so any manipulations with a cub, can lead him to severe stress and subsequent death!

If the hare was still taken away, it is necessary to return it to the same place within a day, the smell of a person will not scare off the mother. Can wipe the surface of the cub's body with a forest litter, a soil layer, this will give the hare a natural smell of the forest, help avoid attracting predators and to some extent neutralize the odors associated with the urban environment and humans. There should be no cats, crows and other predators nearby. If several days have passed, then you can not release the bunny, you need to contact Rehabilitation center.

In no case should you feed the bunny with cream and store-bought milk, condensed milk and so on! Suitable for this only natural goat milk or dog/cat milk substitute. The rabbit will die from inappropriate food, even if it tries very little. Without food, the animal can last no more than 24 hours. It is necessary to call specialists!

A hare is not a rabbit. It is absolutely impossible to keep an adult hare in a cage because of the peculiarities of its physiology. This strong and fast animal dies without active movement. The hare, in principle, does not live in captivity. Unfortunately, an animal without obvious reasons can die even under the supervision of specialists. Domestic a pet, especially in an apartment, will not work out of a hare.

You need to help if: the hare is injured, attacked by predators. If you are not sure how to do the right thing, you can always get advice from specialists: +7 (495) 777-77-77, if necessary, they will arrive at the place, help the animal and try to return it to nature

THE SECTION FROM YUZHNYAYA STREET IN SHCHERBINKA TO LINEAR LANE IN THE SETTLEMENT OF RYAZANOVSKOYE WILL BE MADE FOUR-LANE. IT WILL BE MORE CONVENIENT TO GO TO VARSHAVKA AND GET TO THE OSTAFEVO MCD-2 PLATFORM, – SAID THE HEAD OF THE CITY SOBYANIN.

STUDY TiNAO THE ESTATE IN THE RYAZAN SETTLEMENT OF NOVAYA MOSCOW WAS NAMED BY PUSHKIN

The author of the most famous name of the estate in Tinao was Alexander Sergeyevich Pushkin. According to legend, the poet called the lime alley leading deep into the manor park, along which he liked to walk, «Russian Parnassus». And then they began to call the whole Vyazemsky – Sheremetev estate that way. So its name sounds now – the State Museum-estate «Ostafevo» – «Russian Parnassus». This is told by the portal moscowseasons.com . Writers and poets – Nikolai Gogol and Alexander Griboyedov, Denis Davydov and Evgeny Baratynsky, Wilhelm Kuchelbecker and Adam Mickiewicz. Almost 12 years – From 1804 to 1815– the historiographer Nikolai Karamzin lived in Ostafyev. He was married to the daughter of the owner of the estate of Prince Andrei Vyazemsky, here he wrote «The History of the Russian state». In Ostafiev, Pushkin read to Peter Vyazemsky his poems created by the famous Boldin autumn. The magic of great poetry has remained here for centuries.

Every year in Ostafyev there is a celebration of Pushkin’s poetry. His indispensable guest is Tatiana Hannibal, who has not missed this day once in a quarter of a century. According to the staff of the estate museum, Pushkin’s descendants who came to over the years, they have been coming to the estate, they said that here, like nowhere else, the spirit of the great Russian poet is felt.

Now it is one of the most beautiful estates in Moscow. Recently , the palace with wings, open galleries, an observation terrace and a belvedere, monuments to writers and poets have been renovated. Its restoration is recognized as one of the best.

Pushkin loved this place, and they loved him here. «He lived between us» and «I was born for a peaceful life, for rural silence...» – carved on his monument in the park of the Ostafevo Estate Museum - «Russian Parnassus».

МЕСТО для ВАШЕЙ **ЭФФЕКТИВНОЙ РЕКЛАМЫ!**

A PLACE FOR YOUR EFFECTIVE ADVERTISING! A PROJECT WILL BE BUILT IN NEW MOSCOW BUSINESS CLASS «NOVOE LETOVO»

The start of sales of apartments in the first stage of the residential quarter «New Letovo» has been announced. The developer of the complex is GC Stroykom. This was told to the newspaper NEW MOSCOW in the project management of the company «GROWTH».

«New Letovo» is being built in New Moscow, 8 km from the MKAD on Zimenkovskaya Street, connecting Kaluzhskoye and Kievskoye highways, in the settlement of Sosenskoye. By private car, the road to the MKAD will take no more than 10 minutes, and Filatov Lug metro station is 5 km away. The convenient transport location of the project makes it attractive for those who need to stay involved in the life of the metropolis, and at the same time it’s time to have an opportunity to relax at home from the hustle and bustle of the capital.

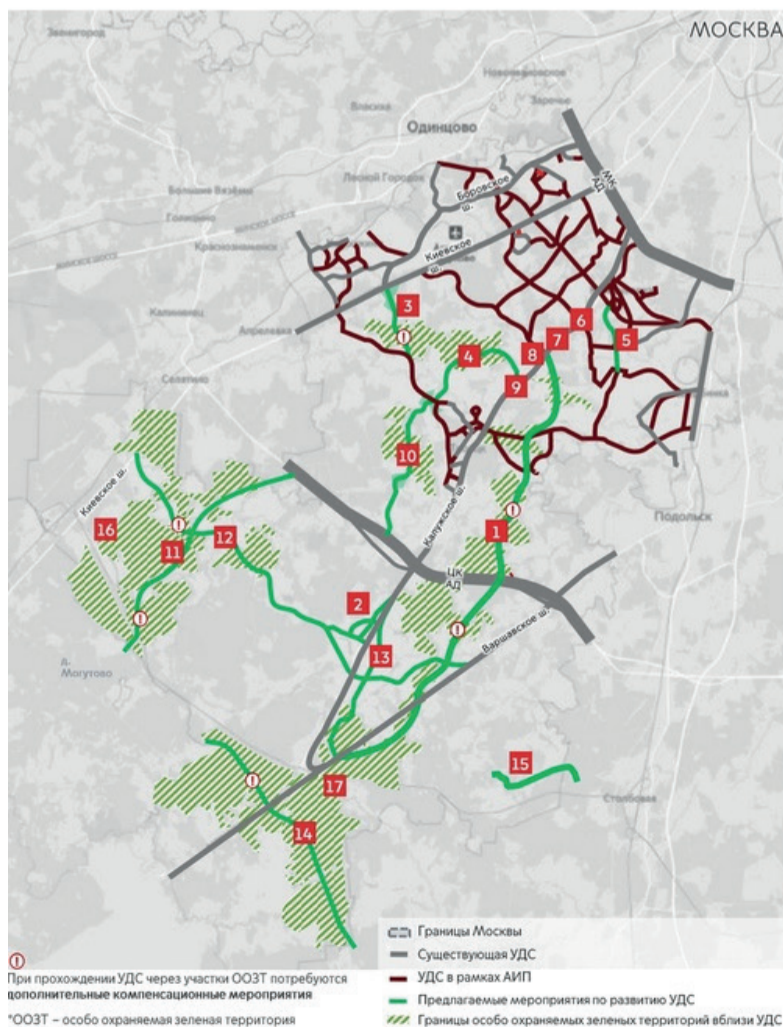

Novoe Letovo is located near historical and architectural monuments, surrounded by Valuevsky Forest Park and the Sosenka River. A five-minute drive from the complex: one of the famous private schools in Moscow, restaurants and shops of the premium segment, tennis courts and swimming pools. A sports and event cluster with a ski slope, a water park and a business center is being built nearby. The project «New Letovo» was developed by the architectural bureau Data.

MOSTRANSPROJECT HAS DEVELOPED SUBPROGRAMS FOR THE DEVELOPMENT OF ROAD TRANSPORT INFRASTRUCTURE MOSCOW FOR THE SECOND HALF OF THE TWENTIES

The main directions of transport infrastructure development in 2025-30 are proposed to be implemented within the framework of five subprograms, including 199 activities. We are talking about such megaprojects as «Reconstruction of the MKAD and the TTK», «Direct Path and connectivity», «Completion of what has been started and expansion of bottlenecks», «Development of new territories» and «Development of bicycle and pedestrian links». Program No. 4 implies the development of UDS on the territory of TiNAO.

Подпрограмма 4 Развитие новых территорий
Предложения по развитию УДС на территории ТиНАО

- Согласно Генеральному плану развития Москвы в части территорий ТиНАО до 2035 года планируется значительный ввод объектов жилой недвижимости и объектов приложения труда
- К 2035 году население составит около 1,5 млн. человек
- Необходимо сбалансированное развитие транспортной инфраструктуры и обеспечение транспортной доступности поселений ТиНАО
- В части развития УДС требуется интенсификация создания межрайонных связей и связей внутри поселений ТиНАО
- В целях повышения районной связности предлагается перечень мероприятий на сумму 124,6 млрд.руб.

Предлагаемые мероприятия			
№	Участок	Длина, км	Улучшение транспортного обслуживания для, тыс. чел.
1	Восточный дублер Калужского шоссе	39,2	16,5
2	УДС для транспортного обслуживания инфекционного корпуса, расположенного вблизи д. Голохвастово поселения Вороновское г.Москвы	10,97	4,4
3	Участок УДС от Боровского шоссе до автодороги «Боровское ш.-Ботаково»	6,9	3,3
4	Северный обход города Троицк	7,0	78,6
5	Транспортные развязки на участке а/д «Солнцево-Бутово-Видное» до автодороги «Воскресенское-Каракашево-Щербинка» с необходимой УДС	6,1	8,9
6	УДС в районе станции метро «Сосенки» линии метрополитена «Столобово-Троицк»	2,1	3,8
7	УДС в районе станции метро «Ракитки» линии метрополитена «Столобово-Троицк»	1,6	2,4
8	УДС в районе станции метро «Десна» линии метрополитена «Столобово-Троицк» с учетом эстакад (3 шт)	4,7	4,1
9	УДС в районе станции метро «Десенское» линии метрополитена «Столобово-Троицк» с учетом тоннеля	4,44	3,2
10	Участок УДС от автодороги «Боровское ш.-Ботаково» до ЦКАД»	10,5	33,4
11	Участок УДС параллельный Киевскому шоссе от ЦКАД до д. Могутово	17,6	2,4
12	Участок УДС от Киевского до Варшавского шоссе, через населенные пункты: Кузнецово-Юрьево-Безобразово	29,7	4,4
13	Участок УДС параллельный Калужскому шоссе от Варшавского шоссе до д. Голохвастово	12,5	3,4
14	Участок УДС на территории пос. Рогово	16,5	2,5
15	А/д Панино– СНТ Осинка – СНТ Малиновка – Платформа 274 км – Чернецкое	10	10,5
16	Дублер Киевского шоссе в подэстакадном пространстве	0,6	5,2

IN NEW MOSCOW FOR SCHOOLCHILDREN WILL OPEN MEDICAL AND ENGINEERING CLASSES

The developer has received a permit for the construction of an educational center for GBOU «School No. 109». The future school will be built in the Sosenskoye settlement, near the village of Nikolo-Khovanskoye on the territory of the Novomoskovsky administrative district of Moscow (NAO). «A three-storey monolithic building is a Y-shaped structure with pronounced volumes of multifunctional blocks and entrance groups with zoning. So, in the southern and south-eastern parts of the site there will be separate entrances for junior, middle and high school students, and in the northern parts – pupils of preschool institutions. On the basis of the issued permits, the developer began construction work,» Igor Voistratenko, chairman of Mosgosstroy nadzor, told the district newspaper TiNAO.

The new educational center will create a system of high-quality training of students for admission to universities, the development of children's creative approach to solving a variety of tasks, communication skills, as well as interest in self-education. Here, in particular, there will be medical and engineering classes, chemical and biological laboratories, a Fab Lab design workshop, as well as a full-fledged theater hall for school performances.

In addition to them, a painting and graphics studio, an atelier and a needlework zone, a pottery workshop, an IT polygon, a planetarium, and an information library center have been designed.

Each functional block of the educational center will house sports cores, including universal transformable halls, as well as multifunctional spaces that can be used as a public «noisy» zone, lecture hall, concert or theater hall.

In addition, two swimming pools will be available to all students: a 25-meter swimming pool and a swimming bath. Each room has a round shape, is distinguished by volumes and decorative elements on the facade of the building.

A physical culture and sports zone with playgrounds for gymnastics, outdoor games and mini-football with bleachers, as well as exercise machines, treadmills and a preschool block with children's play areas will appear on the adjacent territory. The project provides for comprehensive landscaping with the planting of ornamental shrubs and trees, lawn decoration.

NEW SERIES OF «ZOOMERS» ARE BEING FILMED IN NEW MOSCOW

Filming of the new series about teenagers «Zoomers», which will premiere in the summer of 2023, took place at school No. 2120 in TiNAO, whose high school students became actors of mass scenes.

The series «Zoomers», which is 4 seasons and 32 episodes, the VGIK production center shoots in a vertical web series format that is relevant for young people, the timing of each episode is small, only a few minutes. The plot is familiar and close to every modern student: the problem of a disunited team and bullying, misunderstanding of parents and teachers.

According to the creative producer of the project Stepan Savinsky, the location for filming was chosen for a long time until they found school No. 2120: it is large, new, beautiful and meets all the tasks of the set. Classes, an assembly hall, and a media library were involved in the work. Filming took place over the weekend so as not to disrupt the learning process.

The main roles are occupied by the teacher of additional education of the Moscow Palace of Pioneers «Vorobyovy Gory» Alyona Beleva, she plays a young teacher who became a class teacher of the 9th grade on the eve of the OGE and rallied the team, actor Oleg Chugunov, and students of grades 9-11 of school No. 2120 starred in mass scenes and became the youngest actors of the film.

The series «Zoomers» will be released in the summer of 2023 on the Yappy platform, an application for sharing vertical videos.

(The material was prepared by Margarita Timofeeva)

IN THE ELECTION OF DEPUTIES OF NEW MOSCOW FOR THE FIRST TIME THE «CANDIDATES' HEADQUARTERS» PARTICIPATES

In September, elections of candidates for deputies will be held on the territory of 12 settlements and one city district of New Moscow. Residents will elect deputies in Vnukovsky, Voskresensky, Desenovskiy, Marushkinsky, Sosensky, Filimonovsky, Moscow, Kiev, Novofedorovsky, Pervomayskiy settlements, Kokoshkino and Mosrentgen settlements, as well as in Shcherbinka.

For the first time in the elections of deputies of New Moscow, the Candidates' Headquarters (SHK) will participate — a project to support independent candidates created last year by ex-Yablochnik Dmitry Kisiev. At the last municipal elections in Moscow, the SHK nominated 50 candidates, 31 of whom were registered, and two were elected deputies in the Gagarin district of Moscow.

This year, in order to strengthen the chances of victory, the SHK created a political coalition. It included the party of the first Minister of Economy of Russia Andrey Nechaev «Civil Initiative».

As last year, the Candidates' Headquarters will help future deputies to conduct the election campaign from beginning to end: form regional teams, train candidates and volunteers, help with collecting signatures, campaigning and provide legal support. In addition, the specialists attracted by the SHK will help candidates to form an image and design social networks. The parties that supported the idea of a coalition, in particular, the Civic Initiative, will help with the nomination of candidates.

The Candidates' Headquarters did not affiliate with city and municipal authorities, pro-government parties. The project works with volunteers through voluntary donations, and also conducts transparent activities. Participation in the project is safe for all parties: for volunteers, donors and candidates themselves.

«Nowadays it is very important to support independent candidates, because they will have a political impact on the future development of the country,» says Dmitry Kisiev.

SHK is already working with a number of candidates from New Moscow who have been formed into a team.

You can join the company through the website (<https://shtab.kisiev.ru>) or write to the headquarters account (http://t.me/candidate_headquarters)

MORE THAN SEVEN WILL BE BUILT IN THE VORONOVSKY SETTLEMENT KILOMETERS OF THE GAS PIPELINE UNTIL THE END OF 2023

This year, the construction of an engineering network of gas pipelines in the Voronovsky settlement of the Troitsky administrative District is actively continuing.

«Work in the Voronovsky settlement on the construction and laying of a new gas pipeline has been carried out since the beginning of 2022. To date, more than four kilometers have already been built, and in 2023 it is planned to implement the construction of another seven kilometers of new gas pipelines,» Hasan Gasangadzhiev, General Director of MOSGAZ JSC, told the district newspaper TiNAO.

In the course of the ongoing construction of the gas pipeline, an open method has been applied pads. To cross water barriers, a closed method of laying by horizontal directional drilling is used.

The laying of the high-pressure gas pipeline is made of high-quality domestic polyethylene pipes in a protective coating and steel pipes in three-layer polyethylene insulation. For absolute quality control of welded joints, a mobile laboratory of MOSGAZ technical supervision with the use of automatic developing machines and digital radiography complexes goes to the construction site.

Currently, the laying of the gas pipeline is being completed in hard-to-reach forest areas, access to which due to weather conditions turned out to be possible only in winter. All work is carried out without disconnecting consumers from the gas supply. Upon completion of the work, new young trees will be planted.

The implementation of these measures will ensure the long-term development of territories in the creation of infrastructure facilities, federal facilities, large industrial enterprises and several objects of Moscow's cultural heritage.

A SCHOOLGIRL FROM TiNAO FOUND HER ANCESTORS AND WON THE CONTEST «MY PEDIGREE»

A seventh-grader of Moscow school No. 2120 compiled a family tree of her family before 1700, took first place in the All-Russian movement-contest «My Pedigree», and in the process learned that among her relatives there are representatives of the dynasty of Russian tsars and people who, at the behest of Catherine II, inhabited the Siberian lands.

Alina and her mother Oksana Pavlovna Golovchenko became interested in rodology (a science that explores the connections between relatives) when the girl was still in elementary school. The starting point was the memoirs that my mother inherited from her cousin grandfather back in 2015. From them, the researchers found out several interesting facts. Judging by the information contained in the memoirs, among the ancestors of the grandmother Alina had relatives from the Romanov family.

The story on the line of Alina's grandfather turned out to be no less interesting. All relatives live in the Krasnoyarsk Territory. During the time of Catherine II, three Golovchenko brothers went to conquer Siberia. We traveled for many months on carts, but only one brother reached the final goal. His descendant Ivan Gagarkin at the end of the XIX century was a judge in Minusinsk county. Judging by the fragmentary data, he was rich, had herds of horses and a lot of gold, which, presumably, as a treasure hidden somewhere in the Siberian land. To find out the details about this relative, Oksana Pavlovna submitted a request to the archive of the Krasnoyarsk Territory.

Information technologies also helped in building a family tree. Alina enters data about her ancestors into the program Myheritage.com, which works on the principle of a social network: compares uploaded pedigrees and, if it sees similarity, invites the authors to get to know each other – perhaps they will have common ancestors. So Alina and Oksana Pavlovna were able to supplement and expand their family history: they found a branch of Oksana Pavlovna's grandfather's father's brother. It was his son who compiled his family tree in the same program, and artificial intelligence compared the data and reported similarities.

The homeroom teacher of the seventh grader Valentina Velikorodnaya, knowing about the girl's hobby, offered to take part in the contest «My pedigree». It was not difficult to do this, because all the data about relatives had already been collected and uploaded to the online service.

The jury of the competition was so impressed by the work of Alina Golovchenko that she was given the first place.

The work on finding their roots in the Golovchenko family continues, the family tree grows with new branches every year, and Alina has become a real professional in the compilation of pedigrees and gave advice on how to make your family tree: Do not be lazy and interview relatives, especially older ones. Their memories, which sooner or later will go away with them, are the most valuable information on the basis of which you can form the most complete picture of your family.

There are thematic forums and websites on the Internet (<https://vgd.ru/>, <https://rosgenea.ru/>, <https://www.svrt.ru/>), it only takes time and patience to scrupulously study the information and filter what does not apply to relatives, but to namesakes. Work in archives. This is not a quick matter, but with due patience and perseverance it will be invaluable in compiling a pedigree.
